

LittaTrap™

Low-cost catchpit insert for removal of litter and gross pollutants from run-off.

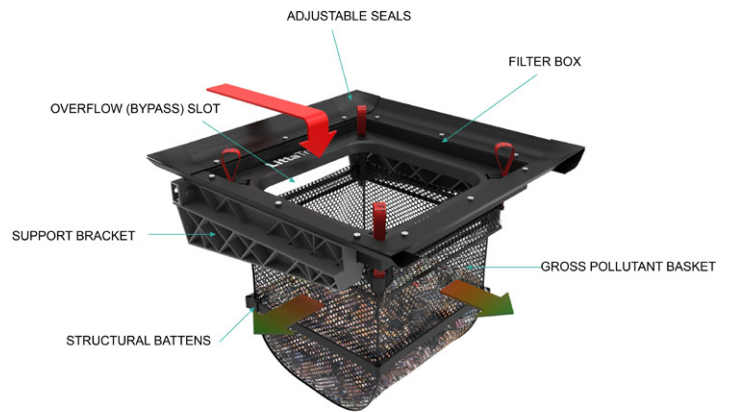

The LittaTrap™ is a cost-effective, innovative catchpit insert designed to be easily retrofitted into new and existing stormwater drains to specifically target litter, plastic and gross pollutants over 5mm.

The LittaTrap™ has patented flow-modifying components that dissipate energy, promote Total Suspended Solids (TSS) capture in sumped catchpit, and provide full capture of gross solids.

Key Benefits

- Easy hand maintenance.
- Easy to install.
- Lightweight for easy handling.
- Various sizes are available and can be custom-designed.
- Ideal for pretreatment – reduce maintenance costs on downstream stormwater devices.
- Optional liners for targeted contaminants e.g. sediment, plastic pellets.

Moderate Sediment Removal

LittaTrap™

The LittaTrap™ is easily maintained by hand
